MECHANICAL POWER TRANSMISSION

# Food Safe mounted ball bearings

**DODGE**<sup>®</sup>

# Safeguard equipment and product integrity

## Food safety and reliability

It goes without saying, every producer wants to avoid product recalls. As regulations and consumers continue to pressure manufacturers for more stringent food safety requirements, producers must take a proactive approach to controlling and preventing food borne illnesses. Having the right processes in place and equipment that is designed around food safety principles is critical.

Average cost per recall to food producers = \$10 million

Aggressive cleaning and sanitation practices are necessary to meet food safety regulations. These processes can be extremely tough on equipment and have devastating and far reaching effects on a company's reputation and profits. To ensure uptime, don't let bearings be the weak link in your production chain. Dodge® Food Safe bearings can improve reliability for your clean-in-place procedures and provide you the assurance needed. Food Safe bearings solve two of the most prominent industry challenges when it comes to bearings - grease washout and corrosion. We conquer these challenges with advanced designs and back our product with an unprecedented 1 year warranty from failure due to water ingress.

Improved cleanability

Extended life

Reduced maintenance

## Dodge Food Safe bearings

### Improved cleanability

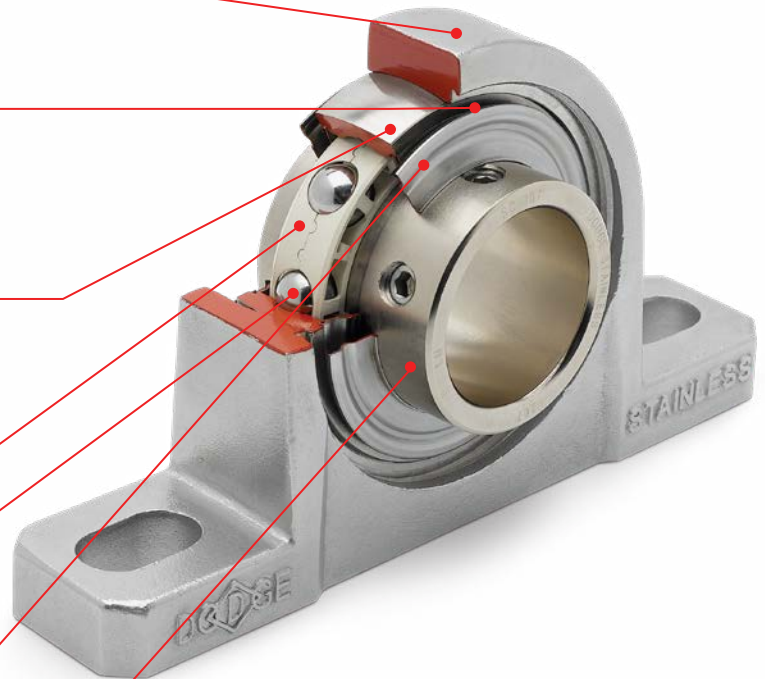

- **Housing**
  - Smooth housing without a grease zerk designed to minimize harboring points
- **Laser identification**
  - Minimizes crevices that can harbor bacteria

### Reduced maintenance

- **Sealed bearings**
  - Sealed and lubed for life design minimizes maintenance costs

### Extended life

- **Max Life cage**
  - Prevents grease washout
- **H1 food grade lubricant**
  - Lubed for life with synthetic food grade lubricant
- **Hydro armor seal**
  - Protects internal rotating elements from water ingress
- **KleenTec insert**
  - Enhanced corrosion resistance from common cleaning agents

## IP69 rated for extended life

Designed to prevent water ingress

Quickly becoming the standard for washdown environments, products rated for IP69 (for water) are protected against high temperature, high pressure spray at close proximity. Although industry guidelines recommend limiting cleaning pressures to 200 psi to prevent atomizing bacteria, our testing is conducted at 7 times this pressure to demonstrate the robustness of our sealing system. To meet the IP69 rating (for water), a bearing cannot allow any water past the seal under the extreme test parameters outlined below. Dodge Food Safe bearings are the first bearings on the market that can meet this requirement without the use of an end cover.

**IP69  
for Water**

### IP69 test procedures

- 176 Fahrenheit
- 1160 - 1450 psi
- Distance: 4 - 6 inches
- Flow rate: 4 gallons per minute
- 5 r/min
- 4 spray positions; 0, 30, 60, 90 degrees
- 30 seconds per position

### Hydro armor seal

Stainless steel flinger is extended for greater protection under high pressure washdown

Four contact lip seals keep water and contamination from entering the bearing

---

## Superior lubrication protection

Max Life cage - grease washout prevention

Compartments hold grease in to prevent grease washout during high pressure cleaning

Unlike standard designs, the max life cage holds a large volume of grease which ensures constant contact with the rolling elements

H1 Food Grade synthetic grease

---

## Backed by an unprecedented 1-year warranty

against failure due to water ingress

We are confident in our testing and simulations of real life clean in place procedures and have backed Food Safe bearings with an unprecedented 1-year warranty against failures due to water ingress. Unlike traditional warranties that only cover materials and workmanship, Food Safe bearings carry a 1-year warranty when products are registered upon installation.

## Lowering your risk of inspection violations

Revolutionary insert design for unmatched corrosion resistance

### KleenTec Coating

A critical factor in extending the life of equipment is the use of corrosion resistant materials. Dodge Food Safe bearings feature a unique insert design starting with a stainless steel base material and finished with our revolutionary, KleenTec top coat for unmatched corrosion resistance.

Cleaning agent	Competitor 1	Competitor 2	Competitor 3	Dodge Food Safe
Phosphoric Acid				
Acid liquid sanitizer				
Cleaning wipe				

### Chemical compatibility - corrosion summary

Cleaning agent	Competitor 1	Competitor 2	Competitor 3	Dodge Food Safe
Phosphoric Acid	Pass	Fail	Pass	Pass
Acid liquid sanitizer	Fail	Fail	Fail	Pass
Cleaning wipe	Fail	Fail	Pass	Pass

## Improved safety and lower risk of recall

Cover rotating shafts with metal detectable end covers

Covers are made from a patent pending detectable polyethylene material containing stainless steel allowing detection by x-ray equipment and metal detectors. Additionally, the bright blue color is highly visible and makes them stand out in food processing applications.

**Open (through shaft) or closed**

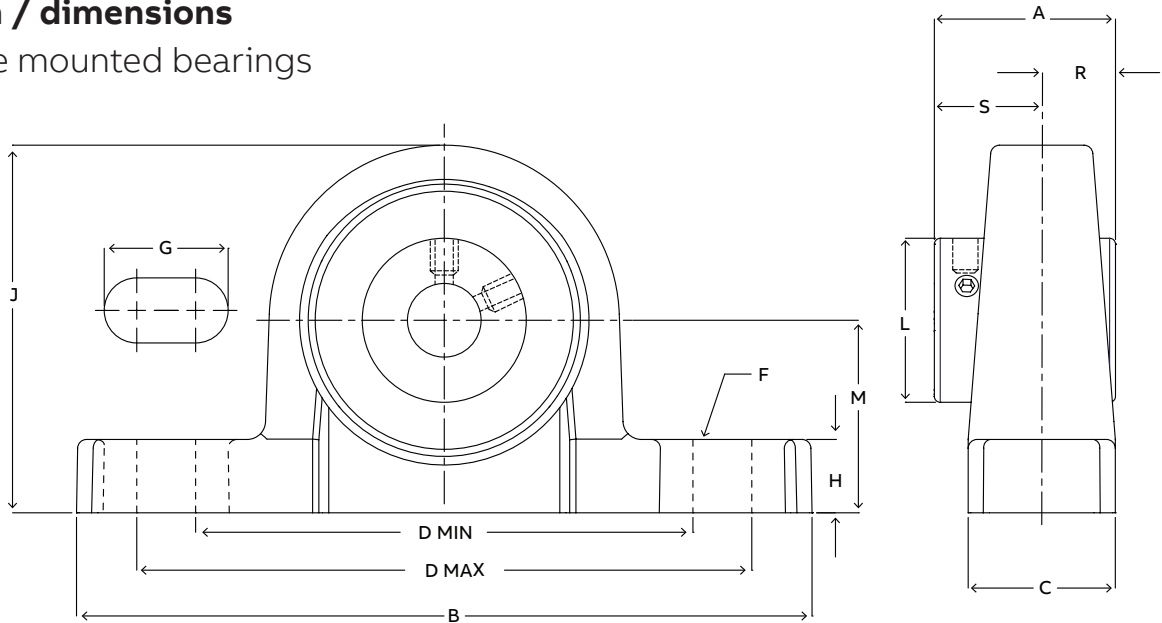

**Secure fit ensures the cover stays in place during cleaning**

## Selection / dimensions
